Summary

Full-stack Software Engineer with experience in developing scalable web and cloud applications using C#, .NET, Python, React, and Azure. Proven track record in building secure, high-performance systems. Actively seeking Software Development Engineer roles to apply technical expertise and problem-solving skills in building impactful products.

Education

Illinois Institute of Technology

Master of Science in Computer Science

Aug 2023 – May 2025

Chicago, IL

Dayanand Sagar University

Bachelor of Technology in Electronics and Communication

Jun 2017 – Jun 2021

Bangalore, India

Experience

Software Engineer

June 2024 – May 2025

CDK Global

Chicago, IL

- Led refactoring of 15+ legacy NuGet dependencies and developed async C# event-driven features using AsyncAPI specs, MSTest, and dependency injection, restoring 5 critical CRM systems during CDK's cyberattack recovery with 100% test coverage and zero production incidents.
- Created Python automation scripts utilizing pandas and asyncio that reduced data validation and log processing time by 40%, significantly improving debugging efficiency and real-time monitoring of CRM system health.
- Built a reusable React-based redirect warning dialog with CDK's internal UI/UX library to improve external link safety in the CRM email client, enhancing user security and reducing phishing incidents by 25%.

Graduate Student Assistant (CPS Testing Examiner)

Jan 2024 – May 2025

Chicago Public Schools (CPS)

Chicago, IL

- Streamlined digital record management by ensuring 100% accuracy in updating test statuses for 50+ students within a large-scale online platform, applying validation checks comparable to software testing and debugging.
- Designed and implemented a structured inventory tracking system with weekly validation logic while overseeing exam sessions for 50+ students, ensuring smooth operations and process reliability.

Cloud Engineer | Graduate Engineer Trainee

June 2021 – July 2023

LTIMindtree(Chevron)

Bangalore, IN

- Developed and deployed 20+ web applications for Client Chevron using Azure PaaS Services, Docker, Kubernetes, and Python while maintaining application servers, databases, and other resources.
- Investigated vendor-reported issues and designed an ASP.NET application to automate weekly data loads, increasing team performance by 40% and saving 40+ hours of manual work.
- Led a team of 5 to develop an ASP.NET and Angular web application with CRUD operations and REST APIs for an in-house bus reservation system, improving ticketing efficiency and customer satisfaction by 20%.

Software Engineer Intern

June 2019 – July 2019

DailyNinja

Bangalore, IN

- Engineered a scalable data pipeline in Python with modular components for acquisition, transformation, and validation of large datasets, improving system accuracy and reliability by 35%.
- Developed and deployed Python automation scripts with reusable functions to streamline data ingestion workflows, reducing manual effort by 25% and increasing overall team throughput.

Projects

F1 Live Hub – Driver & Race Tracker | *Flutter, REST API, Dart, Android Studio*

January 2025

- Built a fully responsive F1-themed mobile app showing live driver & constructor standings, race calendar, and favorite drivers using the Ergast API and shared_preferences for persistent state.
- Implemented a red-black UI theme with card-based layouts for clear data visualization and intuitive navigation, inspired by the official F1 aesthetic.

Flask Based Web App on Diabetes Prediction Using Machine Learning | *Python, Flask, Heroku* **December 2021**

- Developed a comparative study of different classification algorithm models on the Diabetes Dataset to predict if the user has diabetes and subsequently made a Flask-based web app deployed on Heroku.
- Resulted in proof that random forests are efficient and provide better accuracy of 81.168%. and published in Springer.

Technical Skills

Programming Languages: C# , C/C++, Java, Python, SQL, Dart, Javascript, Typescript, NodeJs, Flutter

Frameworks: ASP.NET MVC Framework, ASP.NET WEB API, Angular, Entity Framework Core, React, React Native

Developer Tools: Microsoft Azure, DevOps, Git, Jenkins, ServiceNow, SQL Server Management Studio, Android Studio

Cloud/Architecture: Azure PaaS, AWS, Docker, Kubernetes, MSTest, REST APIs, MongoDB

Certifications: Microsoft Certified Azure DevOps Engineer Expert, Microsoft Certified Azure Developer Associate, Microsoft Certified Azure Data Engineer Associate
